Head Lice Let's fight them Together ONCE A WEEK TAKE A PEEK

Head lice are a normal part of young family life and are nothing to be embarrassed, panicked or ashamed about. They are a part of school life. Head lice are live insects, their empty eggs are called nits. Lice are wingless insects that hold on to the hair, feeding from the blood on the head. They are spread by close head contact but they do not jump. They do not spread disease and they can pass from adults to children and back again. Can we thank you in advance for your continued support and ask you to follow the advice of once a week 'take a peek'. If you need further advice please contact the school nurse on 822889 or www.onceaweektakeapeek.com
